Rethinking Capital

Overview:

Farmers' suicide is the Global Problem. India is far from the only place that has seen farmers commit suicide at alarming rates. The suicides have been happening for some years now. Some states have set up hotlines to counsel farmers at the end of their tether as prices of farm produce fall and money problems arise. In 2014, the National Crime Records Bureau of India reported 5,650 farmer suicides. The highest number of farmer suicides was recorded in 2004 when 18,241 farmers committed suicide. Activists and scholars have offered a number of conflicting reasons for farmer suicides, such as monsoon failure, high debt burdens, genetically modified crops, government policies, public mental health, personal issues and family problems.

Introduction:

A question will be given to each team based on the "overview" above. This event will give you a backdrop of the village and the system how it works. A virtual world of poverty, disease, and environmental variability of farmers, will be depicted, in which your team will be challenged to help a family to survive and prosper over a period. The Focus is required on the problems and decision making processes of farmers, especially the small and marginal farmers, influencing the fortunes of his family and country. We provide you an opportunity to get a feel of those farmers' problems. By doing this simulation, you will not only get to know how the village system works, but also get a fun filled experience.

Rules and Regulation:

- All the teams have to register on the website of SANKALP which will generate their Sankalp ID
- Team Size: Maximum 3 participants.
- There will be only 1 round.
